

Mont Blanc is launching quick attachment EaseMount also on their largest roof box Triton 650

Last spring Mont Blanc introduced their new developed quick attachment EaseMount on the popular roof box Triton 450. The quick attachment is now introduced on their largest box TRITON 650. This box, as well as the smaller Triton 450, is also equipped with Dual Opening function, which easily opens the box from both right and left hand side.

Fitting the roof box to your car roof using Mont Blanc's new quick attachment with a single-handed grip will only take a minute. The EaseMount attachment is already fitted to the roof box – all you need to do is to push the box in place on the roof bars and then, with a simple single-handed grip, tighten the four attachments to the roof bars.

The fact that the roof box easily opens from both sides does not only make the box even easier to fit to the car. The Dual Opening function also facilitates the loading and reloading of the luggage, since you can reach it from both right and left hand side.

Triton 650+ with EaseMount and Dual Opening comes in stylish black metallic. Load securing straps keeping the cargo safe in place are included.

This exclusive roof box is suitable for all kinds of leisure and sports activities all the year round; either you go for golf trips or a camping holiday in the summer or to the Alps for a skiing holiday in winter.
